Trainers' Manual 2016 Holistic Security is a project of Tactical Technology Collective. This publication has been produced with the assistance of the European Union with additional support from Free Press Unlimited.

Trainers' Manual - Holistic security

Security analysis is the analysis of tradeable financial instruments called securities. It deals with finding the proper value of individual securities (i.e., stocks and bonds). These are usually classified into debt securities, equities, or some hybrid of the two. Tradeable credit derivatives are also securities. Commodities or futures contracts are not securities.
