April 04, 2019. There is no doubt that John Young rediscovered Australia's Night Parrot in 2013. But the naturalist may have fabricated just about everything he reported about new populations and nesting sites of the birds over the past two years. That's the conclusion of an independent panel of experts convened by the Australian Wildlife Conservancy (AWC), to review the work of Young, their former employee, who once called himself the "Wild Detective."
