Exercises and Problems in Linear Algebra

This book is the first part of a three-part series titled Problems, Theory and Solutions in Linear Algebra. This first part treats vectors in Euclidean space as well as matrices, matrix algebra and systems of linear equations. We solve linear systems by the use of Gauss elimination and by other means, and investigate the properties of these systems in

Linear Algebra: Graduate Level Problems and Solutions

There are Variety of different Algebra problem present and are solved depending upon their functionality and state. For example, a linear equation problem can't be solved using a quadratic equation formula and vice versa for, e.g., $x+x/2=7$ then solve for x is an equation in one variable for x which can be satisfied by only one value of x.
