Understanding Percent

A percent is a ratio that compares a part to a whole. The second

term in the ratio is always 100. The whole

is 100%. The grid has 60 of 100 squares

shaded. $\frac{60}{100} = 60\%$

So, 60% of the grid is shaded. When the

second term of a ratio is not 100, you can

write an equivalent
