Garment pattern: Pattern is a hard paper which is made by following each individual component for a style of garment or apparel. Actually pattern is a template from which the parts of a garment are traced onto fabric before being cut out and assembled. It is one of the most important parts of garment manufacturing industry.

Basics of Pattern Making in Garment Industry - Clothing ...

A pattern is the actual copy of different parts of a garment that is made by cutting board paper after sketching on it. According to this pattern cloth is cut and then garment is made. For industrial production different patterns are made for different size and a marker is made with these different patterns for a large-scale production.
